A-2703	SERVER-MAIL Phishing attempt possible download of malware	Medium	The user may have opened a malicious email and opened attachments or clicked links.	Escalated ▾

Ticket comments
The hash of this file was confirmed as malicious by over 50 security vendors when I ran it in VirusTotal. This is a known Trojan malware that has now compromised the employee's computer, I am therefore escalating this issue to a level 2 security analyst.

Additional information

Known malicious file hash:
